

S H O R T D E S C R I P T I O N

Pulmon Beatbox is one of the best exponents of the beatbox scene in Spain. Able to move the ten thousand people of a festival only with his voice this off-road artist not only acts acapella. With the help of loop pedals and effects, he also uses his voice to build songs in front of the audience, making each show a unique piece. Thanks to this mix of quality and spectacle, he has received many awards and has accumulated a long list of performances in Spain, France, Mexico, Algeria, Italy, Germany, Holland and Russia. He is currently working with *Rapsusklei* and *Kundala*.

Dani Leonart discovered *human beatbox* in the streets of Barcelona at the age of fifteen. The passion he felt for this discipline led him to make of this a way of life a few years later. In 2010 he debuted as a professional musician making himself known as Pulmon Beatbox and visiting the geography of his country. In 2016 the renowned rap artist *Rapsusklei* proposed him to go on his next tour after seeing him in a live performance. The *Origami tour* was 40 performances for the main cities of Spain and Mexico during 2017. The same year *Pulmon* became champion of the *Spanish Beatbox Battle* qualifying for the fifth official *World Beatbox Championship on 2018*.
